

Colour Coding & Infection Control eLearning Module

Jangro is a dynamic force in the cleaning supply industry and is the largest network of independent janitorial distributors in the UK and Ireland. We are proud to provide excellent service and the highest levels of quality, choice, training and technical support in the industry.

Colour Coding & Infection Control

In this module you will learn to:

- Understand how to prevent bacteria from spreading
- Identify the chain of infection
- List conditions that promote growth of bacteria
- Name the key factors of infection control
- Incorporate colour-coded equipment to your cleaning process

Other eLearning Modules Available

- Carpet Care
- COSHH Awareness
- Floor Care
- Health & Safety
- Housekeeping
- Introduction to Cleaning
- Introduction to Equipment
- Kitchen Hygiene
- Washroom Hygiene

About Colour Coding & Infection Control Module

In all cleaning procedures it is important to prevent potentially harmful bacteria from spreading across the building. One of the most common ways in which bacteria is transmitted is by using the same cleaning equipment in different areas.

This module will not only explain the different types of soils and where they come from but will also describe three methods that you can use to provide effective protection. If that isn't enough, we will also help you identify the chain of infection, what you can do to break it and how to apply an effective control procedure to prevent further contamination.

Identifying the key factors of infection control and incorporating the colour-coded equipment are just two of the things you will be able to adopt in your cleaning regime once you have completed this course.
